

Femi Adeyemi

Backend Developer (Python)

femi.applicant@example.com | 0801 000 0002 | linkedin.com/in/femi-adeyemi | github.com/femi-adeyemi

SUMMARY

Backend developer with 5 years of experience designing and running Django services on PostgreSQL. Focused on clean data modeling, API design, and keeping production systems boring and reliable.

SKILLS

Python, Django, Django REST Framework, PostgreSQL, Docker, Celery, AWS, Redis, pytest

EXPERIENCE

Backend Engineer — Lumen Data Systems, Abuja

2021 — Present

- Owned the core billing service — a Django/PostgreSQL system processing daily invoicing runs.
- Migrated a monolithic scheduler to Celery, removing recurring timeout failures.
- Wrote the team's PostgreSQL query review checklist, now used in every backend PR.

Software Developer — NaijaCloud Solutions

2019 — 2021

- Built internal REST APIs consumed by both a web app and a mobile client.
- Set up the team's first CI pipeline for automated Django test runs.

EDUCATION

B.Sc. Computer Engineering — Obafemi Awolowo University

2015 — 2019
